

Application Readiness at NERSC

IXPUG 2016

Argonne National Lab

Sep. 20, 2016

Richard Gerber

Senior Science Advisor
HPC Department Head (Acting)

NERSC: the Mission HPC Facility for DOE Office of Science Research

U.S. DEPARTMENT OF
ENERGY

Office of
Science

Largest funder of physical
science research in U.S.

Bio Energy, Environment

Computing

Materials, Chemistry, Geophysics

Particle Physics, Astrophysics

Nuclear Physics

Fusion Energy, Plasma Physics

6,000 users, 48 states, 40 countries, universities & national labs

U.S. DEPARTMENT OF
ENERGY

Office of
Science

Edison

5,560 Ivy Bridge Nodes / 24 cores/node
133 K cores, 64 GB memory/node
Cray XC30 / Aries Dragonfly interconnect
6 PB Lustre Cray Sonexion scratch FS

Cori Phase 1

1,630 Haswell Nodes / 32 cores/node
52 K cores, 128 GB memory/node
Cray XC40 / Aries Dragonfly interconnect
24 PB Lustre Cray Sonexion scratch FS
1.5 PB Burst Buffer

Cori Phase 2 - Being installed now!

Cray XC40 system with 9,300 Intel Knights Landing compute nodes

68 cores / 96 GB DRAM / 16 GB HBM

Support the entire Office of Science research community

Begin to transition workload to energy efficient architectures

Data Intensive Science Support

10 Haswell processor cabinets (Phase 1)

NVRAM Burst Buffer 1.5 PB, 1.5 TB/sec

30 PB of disk, >700 GB/sec I/O bandwidth

Integrate with Cori Phase 1 on Aries network for data / simulation / analysis on one system

First American woman Nobel Prize winner, third ever, and first woman in Physiology & Medicine

... for the discovery of the mechanism by which glycogen—a derivative of glucose—is broken down in muscle tissue into lactic acid and then resynthesized in the body and stored as a source of energy

Edison, Hopper, Franklin, Bassi, Carver, Seaborg, Mcurie, Pierre, Jacquard, Bhaskara, Euclid, DaVinci, JWatson, FCrick, Kileen

July-August

9300 KNL nodes arrive, installed, tested

Monday

P1 shut down, P2 stress test

This week

Move I/O, network blades

Add Haswell to P1 to fill holes

Cabling/Re-cabling

Aries/LNET config

Cabinet reconfigs

Now to now+6 weeks

...continue, test, resolve issues

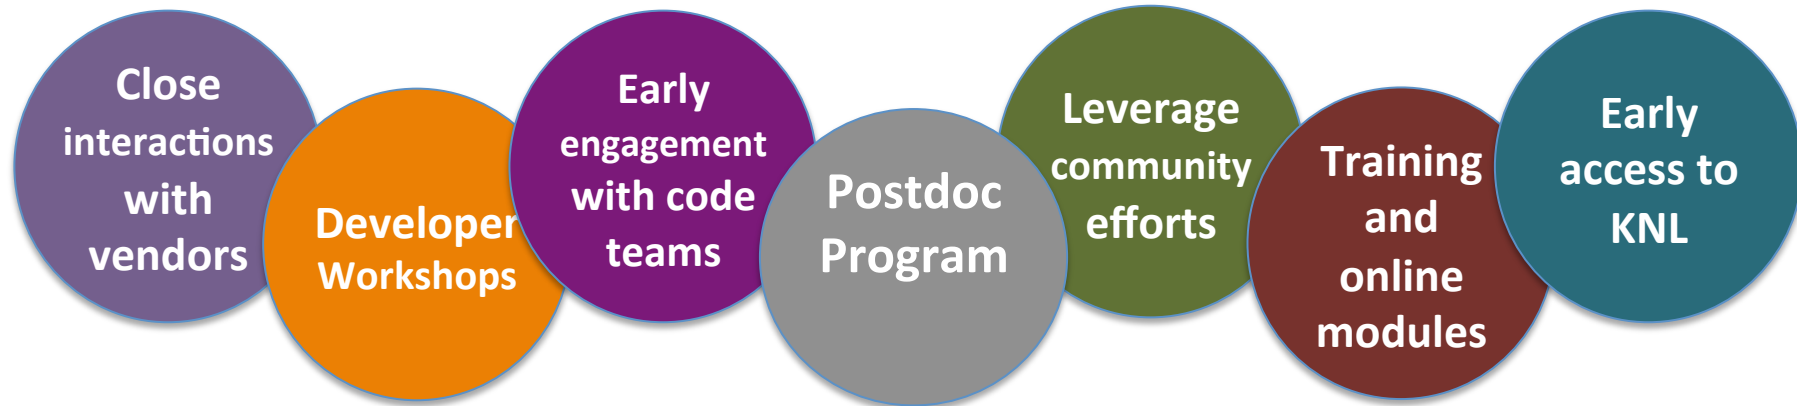

configure SLURM

NESAP code team access ASAP!

Goal: Prepare DOE Office of Science users for many core
Partner closely with ~20 application teams and apply lessons
learned to broad NERSC user community

NESAP activities include:

Application Hours at NERSC 2013

10 codes make up 50% of the workload

25 codes make up 66% of the workload

Edison will be available until 2019

Training and lessons learned will be made available to all application teams

A few NERSC staff have been on Cori Phase 2 as stand-alone system, but with limited usability and access.

Just trying to get things to run; had some success, some failures.

NESAP team will get access once the system is integrated and checks out OK. ~Late October ???

Preparation and optimization work continues with NERSC/LBNL application readiness team, IXPUG, Cray, Intel, DOE labs

Details in Jack Deslippe's talk this afternoon!
