Office of Science

Topics for Discussion

Advanced Scientific Computing Research

- Goal and Outcome of this Workshop
- Other approaches to NERSC requirements gathering
- Benefits of SC/HQ-centric requirements gathering for NERSC resources in the context of Programmatic mission needs
- NERSC requirements gathering workshop schedule
- Past NERSC Requirements WS's and NERSC Follow-on Actions

Goal/Outcome of This Workshop

Advanced Scientific Computing Research

- The mission of NERSC is to **accelerate the pace of scientific discovery** by providing supercomputing capabilities, applicable software and middleware, expert consulting services, data analysis, visualization, and storage, and communications services for research sponsored by the Office of Science.
- The goal of this workshop is to **accurately characterize** and **document** BER's needs for NERSC resources for the next 3-5 years and give input to:
 - **NERSC-8 requirements and**
 - **NERSC Five-Year Plan**
- The tangible outcome of the workshop will be a report that includes both the HPC and data requirements and a supporting narrative.

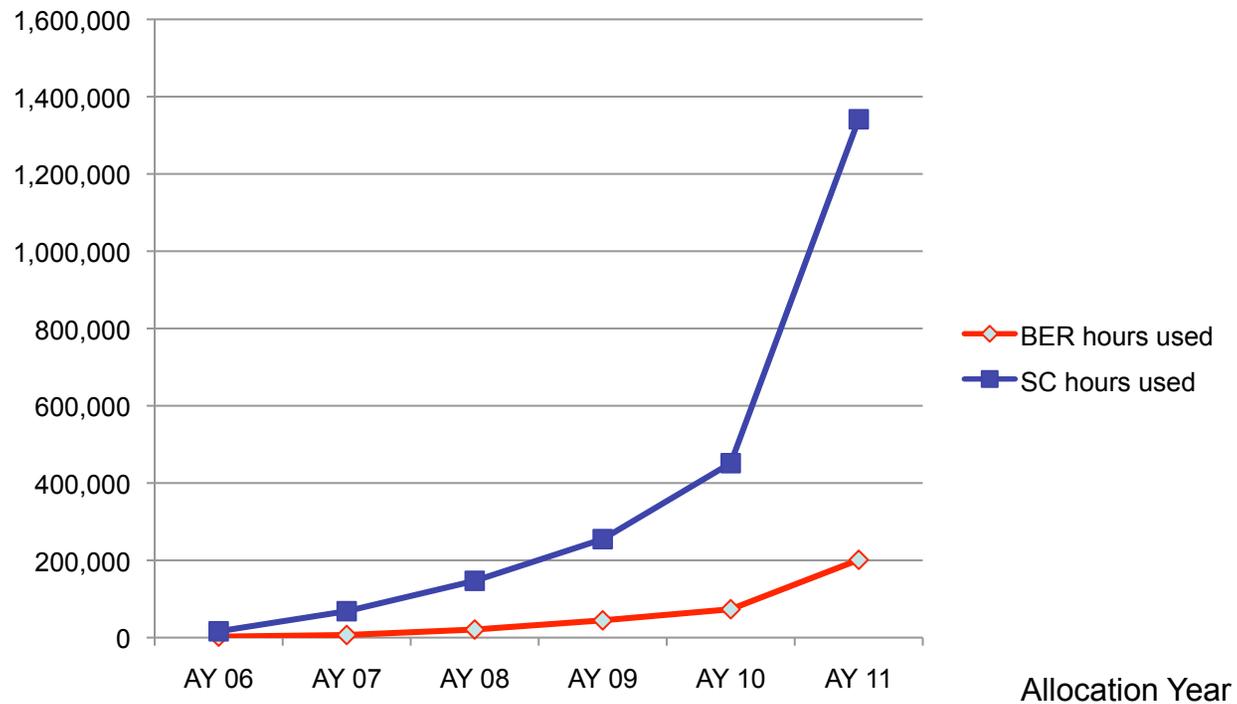

This workshop will help ensure that NERSC continues to provide world-class support for BER's scientific discovery.

Benefits of Conducting NERSC Requirements Workshops in Three-Year Cycle

Advanced Scientific Computing Research

- SC Programs' need for NERSC resources are increasing rapidly, and their requirements are also changing more rapidly than before.
- Requirements gathering workshops in the DC area in the three-year cycle can capture rapidly changing Program-specific needs for NERSC resources better.
- We can document SC programmatic needs for NERSC resources that may not be captured in the existing five-year cycle planning tools.
- SC Program Offices will have direct input on the requirements and can provide forecasts of needs aligned with mission priorities.
- Scientists can get direct feedback on Program mission priorities.
- NERSC Staff can help quantify scientists' needs interactively.
- The new workshops will augment the existing, user-oriented requirements documents.

Program/NERSC Requirements Gathering Workshops

Advanced Scientific Computing Research

- **Program's active involvement is critical in all phases of the workshop: in pre-workshop planning, conducting the workshop, and writing the final report – Program Owns the Workshop**
- **Timeframe and location: Two – three workshops/year, in the DC Area. BER May and HEP Nov 2009; BES February and FES August 2010; ASCR January 2011, . NP May 2011; BER September, 2012**
- **NERSC Facilitators (NERSC staff) have the knowledge of end products; and translate Program's needs in quantitative ways; can help Scientists articulate and quantify their needs if necessary; and help Program and NERSC Management forecast Program's future needs.**
- **Program Office representatives Susan Gregurick, Dorothy Koch, and Renu Joseph have been working very closely with NERSC Program Manager and Workshop Facilitators.**
- **NERSC prepares templates for "Business Cases" for information gathering and report writing for participants' convenience (similar to those used in ESnet WS and the first BER/NERSC WS).**
- **Prior to the workshop, participants fill out the templates to: (1) capture information and (2) use them as a backbone of the workshop report.**

Requirements WS's and NERSC Follow-on Actions

Advanced Scientific Computing Research

- We held the 1st BER/NERSC Requirements Workshop in May 2009.
- BER scientists told us that they wished to be able to reserve NERSC resources recurrently at specific Interval.
- NERSC Response: New Service for Franklin Dedicated Time Reservation:
 - NERSC is testing a new service which will allow users who need access to a large number of nodes to make a reservation for a certain date, time and duration.
 - http://www.nersc.gov/nusers/systems/franklin/running_jobs/reservation.php
- BER, HEP, BES, FES, ASCR, and NP WS participants told NERSC that they wanted a testbed to try new architectures and or languages.
- NERSC Response: a testbed available as part of NERSC-6.
- Offers many training courses .
- We Listen to you!
